ANTI-BILLIONAIRES VOTER GUIDE

TAKING BACK OUR ECONOMY & EVERYDAY LIVELIHOODS

This November, **we're putting a stop to lying billionaires scamming our pockets.** Their record profits are from our unpaid wages and exploitation of workers. Wages that could buy our first homes, pay school tuition, and afford everyday necessities.

We say down with the old guard and their billionaire backers. We're taking back our power one vote at a time. Vote for a California all of us can afford.

Here's our voter's guide. Let's take back our future.

AND REMEMBER: ANYTHING BILLIONAIRE BACKED, WILL ONLY SET US BACK.

DEFINITELY YES

- **PROP 1:** Authorizes $11.25 billion in bonds for affordable housing, production, preservation, and homeownership.
- **PROP 2:** Allows larger deposits into California's rainy-day fund so we can afford to handle a crisis.
- **PROP 3:** Keeps billions of dollars flowing into schools, healthcare and public programs by permanently extending existing tax rates on California's highest earners.
- **PROP 4:** Allows public financing of state and local election campaigns, helping voters have more power, and wealthy donors and corporate interests have less.
- **PROP 5:** Requires a separate election to replace recalled state officials, ensuring the choice stays with majority vote.
- **PROP 40:** One time 5% tax on billionaires to cover federal healthcare cuts (the same cuts that led to billionaire tax breaks).

DEFINITELY NO

- **PROP 38:** Authorizes $8.4 billion for disease research, with almost half of the funding being sent to a single nonprofit.
- **PROP 39:** Prevents citizens from voting unless a government-issued ID (like your SSN) is provided, making it harder to vote and risking identity theft.
- **PROP 41:** Makes it harder for voters to decide how taxes are used, by requiring program audits before special taxes and limiting new tax revenue for public programs. (If approved, it could block Prop 40 - the billionaire tax).
- **PROP 42:** Permanently limits California's ability to tax the ultra wealthy and their accumulated assets, while we all struggle to survive this crisis.
- **PROP 43:** Makes it harder for cities to address the cost of living crisis by requiring two-thirds approval, instead of simple majority.

DEFINITELY NO

- **PROP 44**: Limits community clinics to spending most of their their total revenue on "program services" only.
- **PROP 45:** Fastracks environmental impact review for construction projects (like data centers) to build faster, not safer.

NEUTRAL

- **PROP 37:** Authorizes $25 billion in bonds in downpayment assistance for middle- class homebuyers... with a catch. Proceed with caution.
